

RaceDay - Entity Relationship Diagram

PK = Primary Key | FK = Foreign Key | 1 / M = cardinality (one-to-one, one-to-many)

Notes:

- Users.Role distinguishes Organiser vs Participant (single table, role-based access).
- Events.OrganiserID (FK -> Users.UserID) is restricted to users with Role = Organiser.
- Enrolments.ParticipantID (FK -> Users.UserID) is restricted to users with Role = Participant.
- UserProfiles is 1:1 with Users (UserID is UNIQUE); Results is 1:1 with Enrolments (EnrolmentID is UNIQUE).
- Matches docs/RaceDay_Schema.sql exactly — see that file for full constraints and data types.
